

Access System Upgrade

For Cat® 777 D Series Trucks

Improved Bumper Walkway and Cab Access

Caterpillar is pleased to announce the introduction of a field installed, diagonal stairway retrofit kit for the 777 D Series large off-highway trucks. The stairway improves access to and from the bumper walkway and cab.

Caterpillar's field installed, diagonal stairway retrofit kit will improve access to the bumper walkway and cab, thereby reducing risks of slips, trips and falls. It should be noted that with the newly installed, diagonal stairway upgrade kit, Caterpillar instructs that individuals face the direction of travel when using the stairs, maintain a minimum of two points of contact at all time, and always have one hand in contact with the handrail. The 777 D Series retrofit stairway is 600 mm (24") wide and is integrated diagonally across the front of the machine. This kit includes a stairway, bumper extension, handrails and walkway.

CATERPILLAR®

Cat® Upgrade Kit - 777 D Series Trucks

Enhanced Reliability and Durability

With the introduction of the field installed, diagonal stairway retrofit kit for the 777 D Series trucks, the customer is receiving an integrated solution from Caterpillar.
